

## V: 2021.05 SIM8202E-M2

SIMCom 5G Sub-6G Module

## **Product Description**

The SIM8202E-M2 is the Multi-Band 5G NR/LTE-FDD/LTE-TDD/HSPA+ module which supports R15 5G NSA/SA up to 2.4Gbps data transfer.

It has strong extension capability with abundant interfaces including PCIe, USB3.1, GPIO etc. The module provides much flexibility and ease of integration for customer's applications.

The SIM8202E-M2 adopts M.2 form factor, TYPE 3042-S3-B. AT commands of SIM8202E-M2 are compatible with SIM7912G/SIM8200X-M2 series modules. This also minimizes the investments of customers and enables a short time-to-market.

It is designed for applications that need high throughput data communication in a variety of radio propagation conditions. Due to the unique combination of performance, security and flexibility, this module is ideally suited for many applications.

## **Key Benefits**

- Standard M.2 interface
- High throughput data communication
- AT commands of the SIM8202E-M2 are compatible with SIM7912G/SIM8200X-M2 series modules
